

LANGUAGE IN AMERICA

Metropolitan Statistical Areas

In addition to providing information by county and by state, this report has calculated language totals and percentages for Metropolitan Statistical Areas (MSA). As defined by the U.S. Census Bureau, an MSA is a single county or cluster of counties “containing a substantial population nucleus, together with adjacent communities having a high degree of social and economic integration with that core.” For example, the Memphis, TN-MS-AR MSA covers eight counties across three states, whereas the San Diego, CA, MSA is made up solely of San Diego County, CA. A full definition of MSA as well as a current list of MSAs and their component counties can be found on the U.S. Census Bureau website at <http://www.census.gov/population/www/estimates/metroarea.html>.

This section of the report addresses more than 170 MSAs that cover more than one county. Information for single-county MSAs is noted by asterisks (*) and is provided for comparison purposes if the MSA recorded more than 50 languages. Detailed language breakdowns for single county MSAs can be found in the county-by-county information in the Appendix.

All population figures refer to individuals five years and older.

Abilene, TX
Callahan County, Texas
Jones County, Texas
Taylor County, Texas
